

## PRESS RELEASE

Frankfurt / Main, December 2, 2009

---

### **turn&milltec**

International Fair for Turned Parts,  
Turning and Milling Technology:

December 2 – 5, 2009

Exhibition Center Frankfurt am Main

---

New Hall, high Internationality:

### **turn&milltec with a new hall concept and new services**

turn&milltec (formerly: turntec), International Fair for Turned Parts, Turning and Milling Technology, will give the main points especially in economical tough times. In the year 2009 turn&milltec will be located in hall 8.0, right beside its sister EuroMold – World Fair for Moldmaking and Tooling, Design and Application Development, and will benefit to an even greater extent from the high rate of attendees at EuroMold.

At the 8th turn&milltec such renowned companies as Paul Weber GmbH, Telegärtner Gerätebau GmbH or the Swiss company TOSAG AG will have their products and services on display.

One top priority this year will be milling technology, which also is taken into consideration in the redesigned logo. Hence, more weight will be laid on milling technology, a business which has increased proportionally in the past years. The quota of exhibitors offering milling technology has risen from 18,3% in the year 2006 to 36% in 2008.

The internationality of turn&milltec has developed positively, too. The quota of foreign exhibitors 2009 is 45%, and, companies from France, Italy, Switzerland, China and more will exhibit.

More consulting services around the fair can be utilised at the turn&milltec exhibition office in hall 8.0 stand O92.
